### Int'l observers say a narrow dictated vote

**in Cuba's election**

WASHINGTON, May 22 (PNA) — International observers have said that the results of the Cuban general election were dictated by the government. The observers, who were part of a mission led by the Organization for Security and Co-operation in Europe (OSCE), said that the election was not free and fair. They said that the government had used various tactics to manipulate the results, including intimidation and coercion. The election was held on May 19, and the results were announced on May 20. The government claimed that it had won a landslide victory, but the observers said that the results were far from clear.

Imperial is the only wine that's as good as it looks. It's the only wine that's as good as it tastes. It's the only wine that's as good as it smells. It's the only wine that's as good as it feels. It's the only wine that's as good as it looks, tastes, smells, and feels.

The image shows a page from a Hebrew newspaper. At the top, there is a large, bold headline. Below the headline, the page is organized into multiple columns of text. Some sections are separated by horizontal lines or sub-headings. The text appears to be a mix of news reports, possibly including a significant event given the large headline. The overall layout is characteristic of mid-20th-century newspaper design.

1. *Chlorophyll a* and *b* were determined using a spectrophotometer (Shimadzu UV-160U) at 663 nm and 646 nm, respectively. The concentration of chlorophyll was calculated using the following formula:  $\text{Chlorophyll } a = 12.7 \times \text{OD}_{663} - 2.13 \times \text{OD}_{646}$  and  $\text{Chlorophyll } b = 21.6 \times \text{OD}_{646} - 5.1 \times \text{OD}_{663}$ . The total chlorophyll concentration was the sum of chlorophyll *a* and *b*.
